The Face of Beauty

Dataset

Dataset of many different magazine covers (like Vogue, Elle, Cosmopolitan)

Organise them based on who is on the front cover, record their gender, race, profession, age etc

Visualisation

Interactive screen of magazine covers

timeline of representation over however many years.

you can filter it to see magazine covers with people who have specific characteristics

Critical Angle

Examining how media constructs beauty standards and categorises bodies into data. By reproducing these structures in such an obvious way it's meant to expose and analyse them.

Diversity in Bestselling Fiction

Dataset

Looking at different bestseller lists (NYT bestsellers, Sunday Times etc)

Record info about each title → who the author is, who the protagonist is, genre, success

Visualisation

Interactive bookshelf
Filter based on different categories and those books disappear from the shelf
Bar chart showing characteristics about the author of the novel

Critical Angle

Looking at how bookseller lists are more than unbiased reflections of reader taste, how different marketing budgets, publishers and genres can affect the success of a book.
